

# Health Equity and Wellness for All

## WHAT DOES IT TAKE ?

**The FCHIP backbone is the glue that keeps the collaborative together - elevating community voice, facilitating action, and building sustainability.**

FCHIP provides consistency, follow-through, and, most importantly, sustainable strategies to improve community health, ensure health equity, and maintain momentum for the long term. By collaborating, we achieve more than any single organization could do on its own.

Elevating Community Voice	Facilitating Action	Building Sustainability for Impact	Stewarding Systems Change	Influencing Policy
				
Through the FCHIP Youth Leadership Council (YLC) youth have an opportunity to build connections, further develop leadership skills, elevate their voices with the work of FCHIP and the community at large, and cultivate knowledge on health disparities and systems change.	Trauma and Resilience Training, (over 2,000 trained), the Youth Leadership Council, the Food Security Network Food Policy Council, the Diabetes Symposium, and the Fresno HOPE Pathways Community HUB (PCH) all active initiatives.	By establishing a governance structure, adopting a distributive leadership model, facilitating fundraising and sustainable financing, serving as a care coordination HUB, and by developing CBO and CHW capacity.	Development of the Trauma and Resilience Informed training for community organizations and their staff, the Food Policy Council, and implementation of the Fresno HOPE Pathways Community HUB, an evidence-based whole person care coordination model.	Partnering with Assemblymember Dr. Joaquin Arambula and CACHI to include a one-time budget line item of \$15 million in the Governor's 2023 budget for California Accountable Communities for Health Initiative (CACHI) to fund current CACHI sites, such as FCHIP, and 36 new ACHs throughout California.

*"The work of FCHIP and its partners is integral to building a network of care that will allow us to better understand the needs of our community and monitor our progress toward meeting those needs along the way."*

**DR. AMBER JACOBO**

Former Director, Integrated Data Systems, Fresno County Superintendent of Schools

Food Security Network

Diabetes Collaborative

For more information on FCHIP initiatives, visit [fchip.org/initiatives](https://fchip.org/initiatives)

*"FCHIP is working to make Fresno a place where all people are provided opportunities and the necessary support to thrive."*

*FCHIP's mission is to improve the health of our community by working together with shared purpose and commitment."*

**TONY GONZALEZ, MPH**  
FCHIP, Past Chair

#### DECISION MAKING

By ensuring that the FCHIP decision making body is diverse, inclusive and equitable

#### ENGAGING RESIDENTS

By conducting targeted outreach; engaging and building power with residents from communities that historically experienced discrimination

#### DATA COLLECTION

By investigating structural causes of inequities by facilitating difficult conversations and collaboratively collecting data from target communities

#### FUNDING

By ensuring funding is prioritized to serve historically under resourced communities and groups

#### POWER SHARING

By developing power sharing and powerbuilding practices and intentionally increasing - and monitoring - community trust and participation
